[LeetCode](#)

Product and analytics-oriented Computer Science student passionate about consumer-focused AI solutions, predictive analytics, customer insights, experimentation, and fast-paced startup environments. Experienced in building machine learning and NLP systems for customer behavior analysis and decision-making.

EDUCATION

DIT University

Aug 2023 – May 2027

B.Tech in Computer Science and Engineering

CGPA: 7.4

Class X (Senior Secondary) | CGPA: 8.86

Class XII (Secondary) | CGPA: 7.89

TECHNICAL SKILLS

Programming: Python, Java, SQL

Analytics: Predictive Analytics, Data Analysis, Feature Engineering

ML & AI: TensorFlow, PyTorch, NLP, Scikit-learn

Tools: Git, MySQL, Jupyter, VS Code, Linux

PROJECTS

Customer Churn Prediction using Neural Networks

TensorFlow, Predictive Analytics

- Built a neural network-based churn prediction system using customer behavioral and financial data to identify high-risk customers likely to leave.
- Applied feature engineering, one-hot encoding, and data scaling to improve prediction performance and derive customer retention insights.

Twitter Brand Sentiment Analysis Platform

NLP, Bi-LSTM, Transformers

- Developed an NLP-based sentiment analysis platform to classify customer feedback into positive, negative, and neutral sentiment categories.
- Built a Bi-LSTM model achieving 98% validation accuracy and benchmarked performance against a pretrained RoBERTa Transformer model.

Neural Network-Based Digit Classification System

Deep Learning, NumPy

- Implemented a handwritten digit classification neural network completely from scratch using NumPy without relying on high-level training APIs.
- Manually developed forward propagation, backpropagation, cross-entropy loss, and mini-batch gradient descent workflows.

CERTIFICATIONS & ACHIEVEMENTS

- Python Developer:** HackerRank Certified
- Machine Learning & Deep Learning:** Professional Specializations via Coursera
- Database Management:** SQL Certification (Coursera)
- Dataset Contributor:** Published ML-ready datasets on Kaggle for public research

LEADERSHIP & INITIATIVE

- Mentored students in machine learning, neural networks, and data structures through peer learning sessions.

- Explored AI and analytics applications through self-driven experimentation, open-source collaboration, and technical communities.
